ABOUT

Full-stack developer with experience in building scalable web applications using React.js, Node.js, and MongoDB. Skilled in developing end-to-end features, designing APIs, and improving application performance. Passionate about problem-solving and continuous learning.

WORK EXPERIENCE

Associate Software Engineer at Cosmofeed

Aug 2025 - Present

- Designed and developed a dynamic Admin Dashboard using React.js, Node.js, and MongoDB, enabling flexible configuration of sidebar tabs and improving operational efficiency for internal teams by 50-60%.
- Built a Dispute Management system end-to-end (frontend + backend), allowing seamless tracking, updating, and resolution of disputes, improving workflow visibility and reducing manual effort by 30%.
- Integrated Mixpanel analytics to track user behavior and key events, enabling data-driven decision making and performance monitoring.
- Built and managed multiple modular UI components and tabs within the Admin Dashboard, enhancing usability and maintainability of the platform.
- Diagnosed and resolved critical production issues and bugs, improving application stability and user experience.
